To Whomever,

You really have a lot of nerve since it is you that actually re-directs my 22 year old website. I am looking into litigation against YOU, GOOGLE and FIREBOX since you seem to have appointed yourselves the Sheriff of the Internet.

First and foremost this is The United States of America and you must follow our LAWS!

In other words:

- 1: You must identify the issue not a generalization (Prove it).**
- 2: How you make such a claim (by who)**
- 3: You can warn but not re-direct a website (maybe still to be decided by a court not you)**

I lease servers (5 year leases renewable) from I-Power Web and they have scanned my website for me (results included with this e-mail).

I have provided a link as well as attached my resume' so you might reconsider your actions/attacks on such substantial websites that have been around at lot longer than you have even existed!

Link: <http://www.oicu.com/rayres/rayresweb.pdf>

You are costing me thousands of dollars daily and will consider litigation if necessary to stop you and your cronies and your flagrant efforts against me and quite frankly I consider you, google and firefox the new microsoft of the internet (doing what you feel like to make money! aka "Sleaze")

I suggest that however you received this information that you actually check the website yourselves and report back to me with facts not innuendos!

I am also checking with Homeland Security to see if you might be placed on the domestic terror list!

Consider this a "Letter of intent"

Please govern yourselves accordingly.

Yours very truly,

Raymond Brooks, Esq.
